DISA STIG Microsoft Windows Server 2016 Mission Support Sensitive (Version 2, Revision 1)	164	164	38
▼ SRG-OS-000480-GPOS-00227	1	1	0
■ Systems must be maintained at a supported servicing level.		1	0
▼ SRG-OS-000080-GPOS-00048	1	1	0
■ Local volumes must use a format that supports NTFS attributes.		1	0
▼ SRG-OS-000095-GPOS-00049	1	1	0
■ The Fax Server role must not be installed.		1	0
▼ SRG-OS-000096-GPOS-00050	1	1	0
■ The Microsoft FTP service must not be installed unless required.		1	0
▼ SRG-OS-000095-GPOS-00049	1	1	0
■ The Peer Name Resolution Protocol must not be installed.		1	0
▼	1	1	0
■ Simple TCP/IP Services must not be installed.		1	0
▼ SRG-OS-000096-GPOS-00050	0	0	1
■ The Telnet Client must not be installed.		0	1
▼ SRG-OS-000095-GPOS-00049	1	1	0
■ The TFTP Client must not be installed.		1	0
▼	1	1	0
■ The Server Message Block (SMB) v1 protocol must be uninstalled.		1	0

		● 1 ● 0
	The Server Message Block (SMB) v1 protocol must be disabled on the SMB server.	●
		● 1 ● 0
	The Server Message Block (SMB) v1 protocol must be disabled on the SMB client.	●
		● 1 ● 0
	Windows PowerShell 2.0 must not be installed.	●
	SRG-OS-000329-GPOS-00128	● 1 ● 0
	Windows 2016 account lockout duration must be configured to 15 minutes or greater.	●
	SRG-OS-000021-GPOS-00005	● 1 ● 0
	Windows Server 2016 must have the number of allowed bad logon attempts configured to three or less.	●
		● 1 ● 0
	Windows Server 2016 must have the period of time before the bad logon counter is reset configured to 15 minutes or greater.	●
	SRG-OS-000077-GPOS-00045	● 1 ● 0
	Windows Server 2016 password history must be configured to 24 passwords remembered.	●
	SRG-OS-000076-GPOS-00044	● 1 ● 0
	Windows Server 2016 maximum password age must be configured to 60 days or less.	●
	SRG-OS-000075-GPOS-00043	● 1 ● 0
	Windows Server 2016 minimum password age must be configured to at least one day.	●
	SRG-OS-000078-GPOS-00046	● 1 ● 0
	Windows Server 2016 minimum password length must be configured to 14 characters.	●
	SRG-OS-000069-GPOS-00037	● 1 ● 0
	Windows Server 2016 must have the built-in Windows password complexity policy enabled.	●

▼ SRG-OS-000073-GPOS-00041	● 1	● 0
Windows Server 2016 reversible password encryption must be disabled.	●	
▼ SRG-OS-000057-GPOS-00027	● 0	● 1
Permissions for the Application event log must prevent access by non-privileged accounts.		●
▼	● 0	● 1
Permissions for the Security event log must prevent access by non-privileged accounts.		●
▼	● 0	● 1
Permissions for the System event log must prevent access by non-privileged accounts.		●
▼ SRG-OS-000257-GPOS-00098	● 0	● 1
Event Viewer must be protected from unauthorized modification and deletion.		●
▼ SRG-OS-000470-GPOS-00214	● 1	● 0
Windows Server 2016 must be configured to audit Account Logon - Credential Validation successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Account Logon - Credential Validation failures.	●	
▼ SRG-OS-000327-GPOS-00127	● 1	● 0
Windows Server 2016 must be configured to audit Account Management - Other Account Management Events successes.	●	
▼ SRG-OS-000004-GPOS-00004	● 1	● 0
Windows Server 2016 must be configured to audit Account Management - Security Group Management successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Account Management - User Account Management successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Account Management - User Account Management failures.	●	

▼ SRG-OS-000327-GPOS-00127	● 1	● 0
Windows Server 2016 must be configured to audit Detailed Tracking - Process Creation successes.	●	
▼ SRG-OS-000240-GPOS-00090	● 1	● 0
Windows Server 2016 must be configured to audit Logon/Logoff - Account Lockout successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Logon/Logoff - Account Lockout failures.	●	
▼ SRG-OS-000032-GPOS-00013	● 1	● 0
Windows Server 2016 must be configured to audit Logon/Logoff - Logoff successes.	●

Windows Server 2016 must be configured to audit Logon/Logoff - Logon successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Logon/Logoff - Logon failures.	●	
▼ SRG-OS-000470-GPOS-00214	● 1	● 0
Windows Server 2016 must be configured to audit Logon/Logoff - Special Logon successes.	●	
▼	● 0	● 1
Windows 2016 must be configured to audit Object Access - Other Object Access Events successes.		●
▼	● 0	● 1
Windows 2016 must be configured to audit Object Access - Other Object Access Events failures.		●
▼ SRG-OS-000327-GPOS-00127	● 1	● 0
Windows Server 2016 must be configured to audit Policy Change - Audit Policy Change successes.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to audit Policy Change - Audit Policy Change failures.	●	

	1 0
Windows Server 2016 must be configured to audit Policy Change - Authentication Policy Change successes.	
	1 0
Windows Server 2016 must be configured to audit Policy Change - Authorization Policy Change successes.	
	1 0
Windows Server 2016 must be configured to audit Privilege Use - Sensitive Privilege Use successes.	
	1 0
Windows Server 2016 must be configured to audit Privilege Use - Sensitive Privilege Use failures.	
	1 0
Windows Server 2016 must be configured to audit System - IPsec Driver successes.	
	1 0
Windows Server 2016 must be configured to audit System - IPsec Driver failures.	
	1 0
Windows Server 2016 must be configured to audit System - Other System Events successes.	
	1 0
Windows Server 2016 must be configured to audit System - Other System Events failures.	
	1 0
Windows Server 2016 must be configured to audit System - Security State Change successes.	
	1 0
Windows Server 2016 must be configured to audit System - Security System Extension successes.	
	1 0
Windows Server 2016 must be configured to audit System - System Integrity successes.	

		● 1	● 0
	Windows Server 2016 must be configured to audit System - System Integrity failures.	●	
	SRG-OS-000095-GPOS-00049	● 1	● 0
	The display of slide shows on the lock screen must be disabled.	●	
		● 1	● 0
	WDigest Authentication must be disabled on Windows Server 2016.	●	
	SRG-OS-000480-GPOS-00227	● 1	● 0
	Internet Protocol version 6 (IPv6) source routing must be configured to the highest protection level to prevent IP source routing.	●	
		● 1	● 0
	Source routing must be configured to the highest protection level to prevent Internet Protocol (IP) source routing.	●	
		● 1	● 0
	Windows Server 2016 must be configured to prevent Internet Control Message Protocol (ICMP) redirects from overriding Open Shortest Path First (OSPF)-generated routes.	●	
	SRG-OS-000420-GPOS-00186	● 1	● 0
	Windows Server 2016 must be configured to ignore NetBIOS name release requests except from WINS servers.	●	
	SRG-OS-000480-GPOS-00227	● 1	● 0
	Insecure logons to an SMB server must be disabled.	●	
		● 1	● 0
	Hardened UNC paths must be defined to require mutual authentication and integrity for at least the *\SYSVOL and *\NETLOGON shares.	●	
	SRG-OS-000042-GPOS-00020	● 1	● 0
	Command line data must be included in process creation events.	●	
	SRG-OS-000480-GPOS-00227	● 1	● 0
	Early Launch Antimalware, Boot-Start Driver Initialization Policy must prevent boot drivers identified as bad.	●	

		● 1	● 0
	Group Policy objects must be reprocessed even if they have not changed.	●	
	SRG-OS-000095-GPOS-00049	● 1	● 0
	Downloading print driver packages over HTTP must be prevented.	●	
		● 1	● 0
	Printing over HTTP must be prevented.	●	
		● 1	● 0
	The network selection user interface (UI) must not be displayed on the logon screen.	●	
	SRG-OS-000480-GPOS-00227	● 1	● 0
	Users must be prompted to authenticate when the system wakes from sleep (on battery).	●	
		● 1	● 0
	Users must be prompted to authenticate when the system wakes from sleep (plugged in).	●	
	SRG-OS-000095-GPOS-00049	● 1	● 0
	The Application Compatibility Program Inventory must be prevented from collecting data and sending the information to Microsoft.	●	
	SRG-OS-000368-GPOS-00154	● 1	● 0
	AutoPlay must be turned off for non-volume devices.	●	
		● 1	● 0
	The default AutoRun behavior must be configured to prevent AutoRun commands.	●	
		● 1	● 0
	AutoPlay must be disabled for all drives.	●	
	SRG-OS-000134-GPOS-00068	● 1	● 0
	Administrator accounts must not be enumerated during elevation.	●	
	SRG-OS-000480-GPOS-00227	● 1	● 0

Windows Telemetry must be configured to Security or Basic.	1	0
SRG-OS-000341-GPOS-00132	1	0
The Application event log size must be configured to 32768 KB or greater.	1	0
The Security event log size must be configured to 196608 KB or greater.	1	0
The System event log size must be configured to 32768 KB or greater.	1	0
SRG-OS-000095-GPOS-00049	1	0
Windows Server 2016 Windows SmartScreen must be enabled.	1	0
SRG-OS-000433-GPOS-00192	1	0
Explorer Data Execution Prevention must be enabled.	1	0
SRG-OS-000480-GPOS-00227	1	0
Turning off File Explorer heap termination on corruption must be disabled.	1	0
File Explorer shell protocol must run in protected mode.	1	0
SRG-OS-000373-GPOS-00157	1	0
Passwords must not be saved in the Remote Desktop Client.	1	0
SRG-OS-000138-GPOS-00069	1	0
Local drives must be prevented from sharing with Remote Desktop Session Hosts.	1	0
SRG-OS-000373-GPOS-00157	1	0
Remote Desktop Services must always prompt a client for passwords upon connection.	1	0
SRG-OS-000250-GPOS-00093	1	0
The Remote Desktop Session Host must require secure Remote Procedure Call (RPC) communications.	1	0

		● 1 ● 0
	Remote Desktop Services must be configured with the client connection encryption set to High Level.	●
	SRG-OS-000480-GPOS-00227	● 1 ● 0
	Attachments must be prevented from being downloaded from RSS feeds.	●
	SRG-OS-000095-GPOS-00049	● 1 ● 0
	Basic authentication for RSS feeds over HTTP must not be used.	●
		● 1 ● 0
	Indexing of encrypted files must be turned off.	●
	SRG-OS-000362-GPOS-00149	● 1 ● 0
	Users must be prevented from changing installation options.	●
		● 1 ● 0
	The Windows Installer Always install with elevated privileges option must be disabled.	●
	SRG-OS-000480-GPOS-00227	● 1 ● 0
	Users must be notified if a web-based program attempts to install software.	●
	SRG-OS-000480-GPOS-00229	● 1 ● 0
	Automatically signing in the last interactive user after a system-initiated restart must be disabled.	●
	SRG-OS-000042-GPOS-00020	● 1 ● 0
	PowerShell script block logging must be enabled.	●
	SRG-OS-000125-GPOS-00065	● 1 ● 0
	The Windows Remote Management (WinRM) client must not use Basic authentication.	●
	SRG-OS-000393-GPOS-00173	● 1 ● 0
	The Windows Remote Management (WinRM) client must not allow unencrypted traffic.	●
	SRG-OS-000125-GPOS-00065	● 1 ● 0

<input checked="" type="checkbox"/> The Windows Remote Management (WinRM) client must not use Digest authentication.	1	0

■ Anonymous enumeration of Security Account Manager (SAM) accounts must not be allowed.	●	
▼ SRG-OS-000138-GPOS-00069	● 1	● 0
■ Anonymous enumeration of shares must not be allowed.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
■ Windows Server 2016 must be configured to prevent anonymous users from having the same permissions as the Everyone group.	●	
▼ SRG-OS-000138-GPOS-00069	● 1	● 0
■ Anonymous access to Named Pipes and Shares must be restricted.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
■ Services using Local System that use Negotiate when reverting to NTLM authentication must use the computer identity instead of authenticating anonymously.	●	
▼	● 1	● 0
■ NTLM must be prevented from falling back to a Null session.	●	
▼	● 1	● 0
■ PKU2U authentication using online identities must be prevented.	●	
▼ SRG-OS-000120-GPOS-00061	● 1	● 0
■ Kerberos encryption types must be configured to prevent the use of DES and RC4 encryption suites.	●	

▼ SRG-OS-000073-GPOS-00041	● 1	● 0
Windows Server 2016 must be configured to prevent the storage of the LAN Manager hash of passwords.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
The LAN Manager authentication level must be set to send NTLMv2 response only and to refuse LM and NTLM.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to at least negotiate signing for LDAP client signing.	●	
▼	● 1	● 0
Session security for NTLM SSP-based clients must be configured to require NTLMv2 session security and 128-bit encryption.	●	
▼	● 1	● 0
Session security for NTLM SSP-based servers must be configured to require NTLMv2 session security and 128-bit encryption.	●	
▼ SRG-OS-000067-GPOS-00035	● 1	● 0
Users must be required to enter a password to access private keys stored on the computer.	●	
▼ SRG-OS-000033-GPOS-00014	● 1	● 0
Windows Server 2016 must be configured to use FIPS-compliant algorithms for encryption, hashing, and signing.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
The default permissions of global system objects must be strengthened.	●	
▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control approval mode for the built-in Administrator must be enabled.	●	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
UIAccess applications must not be allowed to prompt for elevation without using the secure desktop.	●	
▼	● 1	● 0
User Account Control must, at a minimum, prompt administrators for consent on the secure desktop.	●	

▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control must automatically deny standard user requests for elevation.	● 0	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
User Account Control must be configured to detect application installations and prompt for elevation.	● 0	
▼	● 1	● 0
User Account Control must only elevate UIAccess applications that are installed in secure locations.	● 0	
▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control must run all administrators in Admin Approval Mode, enabling UAC.	● 0	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
User Account Control must virtualize file and registry write failures to per-user locations.	● 0	
▼ SRG-OS-000324-GPOS-00125	● 0	● 1
The Access Credential Manager as a trusted caller user right must not be assigned to any groups or accounts.		● 0

■ The setting Microsoft network server: Digitally sign communications (always) must be configured to Enabled.	●	
▼	● 1	● 0
■ The setting Microsoft network server: Digitally sign communications (if client agrees) must be configured to Enabled.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
■ Anonymous enumeration of Security Account Manager (SAM) accounts must not be allowed.	●	
▼ SRG-OS-000138-GPOS-00069	● 1	● 0
■ Anonymous enumeration of shares must not be allowed.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
■ Windows Server 2016 must be configured to prevent anonymous users from having the same permissions as the Everyone group.	●	
▼ SRG-OS-000138-GPOS-00069	● 1	● 0
■ Anonymous access to Named Pipes and Shares must be restricted.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
■ Services using Local System that use Negotiate when reverting to NTLM authentication must use the computer identity instead of authenticating anonymously.	●	
▼	● 1	● 0
■ NTLM must be prevented from falling back to a Null session.	●	
▼	● 1	● 0
■ PKU2U authentication using online identities must be prevented.	●	
▼ SRG-OS-000120-GPOS-00061	● 1	● 0
■ Kerberos encryption types must be configured to prevent the use of DES and RC4 encryption suites.	●	

▼ SRG-OS-000073-GPOS-00041	● 1	● 0
Windows Server 2016 must be configured to prevent the storage of the LAN Manager hash of passwords.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
The LAN Manager authentication level must be set to send NTLMv2 response only and to refuse LM and NTLM.	●	
▼	● 1	● 0
Windows Server 2016 must be configured to at least negotiate signing for LDAP client signing.	●	
▼	● 1	● 0
Session security for NTLM SSP-based clients must be configured to require NTLMv2 session security and 128-bit encryption.	●	
▼	● 1	● 0
Session security for NTLM SSP-based servers must be configured to require NTLMv2 session security and 128-bit encryption.	●	
▼ SRG-OS-000067-GPOS-00035	● 1	● 0
Users must be required to enter a password to access private keys stored on the computer.	●	
▼ SRG-OS-000033-GPOS-00014	● 1	● 0
Windows Server 2016 must be configured to use FIPS-compliant algorithms for encryption, hashing, and signing.	●	
▼ SRG-OS-000480-GPOS-00227	● 1	● 0
The default permissions of global system objects must be strengthened.	●	
▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control approval mode for the built-in Administrator must be enabled.	●	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
UIAccess applications must not be allowed to prompt for elevation without using the secure desktop.	●	
▼	● 1	● 0
User Account Control must, at a minimum, prompt administrators for consent on the secure desktop.	●	

▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control must automatically deny standard user requests for elevation.	● 0	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
User Account Control must be configured to detect application installations and prompt for elevation.	● 0	
▼	● 1	● 0
User Account Control must only elevate UIAccess applications that are installed in secure locations.	● 0	
▼ SRG-OS-000373-GPOS-00157	● 1	● 0
User Account Control must run all administrators in Admin Approval Mode, enabling UAC.	● 0	
▼ SRG-OS-000134-GPOS-00068	● 1	● 0
User Account Control must virtualize file and registry write failures to per-user locations.	● 0	
▼ SRG-OS-000324-GPOS-00125	● 0	● 1
The Access Credential Manager as a trusted caller user right must not be assigned to any groups or accounts.		● 0
▼	● 0	● 1
The Act as part of the operating system user right must not be assigned to any groups or accounts.		● 0
▼ SRG-OS-000080-GPOS-00048	● 0	● 1
The Allow log on locally user right must only be assigned to the Administrators group.		● 0
▼ SRG-OS-000324-GPOS-00125	● 0	● 1
The Back up files and directories user right must only be assigned to the Administrators group.		● 0
▼	● 0	● 1
The Create a pagefile user right must only be assigned to the Administrators group.		● 0
▼	● 0	● 1
The Create global objects user right must only be assigned to Administrators, Service, Local Service, and Network Service.		● 0

		● 0 ● 1
	The Create permanent shared objects user right must not be assigned to any groups or accounts.	●
	The Create symbolic links user right must only be assigned to the Administrators group.	● 1 ● 0
	The Debug programs user right must only be assigned to the Administrators group.	●
	The Force shutdown from a remote system user right must only be assigned to the Administrators group.	●
	The Generate security audits user right must only be assigned to Local Service and Network Service.	●
	The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.	●
	The Increase scheduling priority user right must only be assigned to the Administrators group.	●
	The Load and unload device drivers user right must only be assigned to the Administrators group.	●
	The Lock pages in memory user right must not be assigned to any groups or accounts.	●
	SRG-OS-000057-GPOS-00027	● 0 ● 1
	The Manage auditing and security log user right must only be assigned to the Administrators group.	●
	SRG-OS-000324-GPOS-00125	● 0 ● 1
	The Modify firmware environment values user right must only be assigned to the Administrators group.	●

	 0  1
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 0  1
 The Profile single process user right must only be assigned to the Administrators group.	
	 0  1
 The Create a token object user right must not be assigned to any groups or accounts.	
	 0  1
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 0  1
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.

The Deny log on as a batch job user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on as a service user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems. No other groups or accounts must be assigned this right.

The Deny log on locally user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on through Remote Desktop Services user right on member servers must be configured to prevent access from highly privileged domain accounts and all local accounts on domain systems, and from unauthenticated access on all systems.

Unauthorized accounts must not have the Enable computer and user accounts to be trusted for delegation user right on member servers.

The Force shutdown from a remote system user right must only be assigned to the Administrators group.

The Generate security audits user right must only be assigned to Local Service and Network Service.

The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.

The Increase scheduling priority user right must only be assigned to the Administrators group.

	 1  0
 The Load and unload device drivers user right must only be assigned to the Administrators group.	
	 1  0
 The Lock pages in memory user right must not be assigned to any groups or accounts.	
	 1  0
 The Manage auditing and security log user right must only be assigned to the Administrators group.	
	 1  0
 The Modify firmware environment values user right must only be assigned to the Administrators group.	
	 1  0
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 1  0
 The Profile single process user right must only be assigned to the Administrators group.	
	 1  0
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 1  0
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.

■ The Debug programs user right must only be assigned to the Administrators group.	●	
▼ SRG-OS-000080-GPOS-00048	● 0	● 1

The Deny access to this computer from the network user right on member servers must be configured to prevent access from highly privileged domain accounts and local accounts on domain systems, and from unauthenticated access on all systems.

● 0 ● 1

The Deny log on as a batch job user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

● 0 ● 1

The Deny log on as a service user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems. No other groups or accounts must be assigned this right.

● 0 ● 1

The Deny log on locally user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

● 0 ● 1

The Deny log on through Remote Desktop Services user right on member servers must be configured to prevent access from highly privileged domain accounts and all local accounts on domain systems, and from unauthenticated access on all systems.

● 1 ● 0

Unauthorized accounts must not have the Enable computer and user accounts to be trusted for delegation user right on member servers.

● 1 ● 0

The Force shutdown from a remote system user right must only be assigned to the Administrators group.

● 1 ● 0

The Generate security audits user right must only be assigned to Local Service and Network Service.

● 1 ● 0

The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.

● 1 ● 0

The Increase scheduling priority user right must only be assigned to the Administrators group.

	 1  0
 The Load and unload device drivers user right must only be assigned to the Administrators group.	
	 1  0
 The Lock pages in memory user right must not be assigned to any groups or accounts.	
	 1  0
 The Manage auditing and security log user right must only be assigned to the Administrators group.	
	 1  0
 The Modify firmware environment values user right must only be assigned to the Administrators group.	
	 1  0
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 1  0
 The Profile single process user right must only be assigned to the Administrators group.	
	 1  0
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 1  0
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.

The Deny log on as a service user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems. No other groups or accounts must be assigned this right.

The Deny log on locally user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on through Remote Desktop Services user right on member servers must be configured to prevent access from highly privileged domain accounts and all local accounts on domain systems, and from unauthenticated access on all systems.

Unauthorized accounts must not have the Enable computer and user accounts to be trusted for delegation user right on member servers.

The Force shutdown from a remote system user right must only be assigned to the Administrators group.

The Generate security audits user right must only be assigned to Local Service and Network Service.

The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.

The Increase scheduling priority user right must only be assigned to the Administrators group.

	 1  0
 The Load and unload device drivers user right must only be assigned to the Administrators group.	
	 1  0
 The Lock pages in memory user right must not be assigned to any groups or accounts.	
	 1  0
 The Manage auditing and security log user right must only be assigned to the Administrators group.	
	 1  0
 The Modify firmware environment values user right must only be assigned to the Administrators group.	
	 1  0
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 1  0
 The Profile single process user right must only be assigned to the Administrators group.	
	 1  0
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 1  0
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.

The Deny access to this computer from the network user right on member servers must be configured to prevent access from highly privileged domain accounts and local accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on as a batch job user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on as a service user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems. No other groups or accounts must be assigned this right.

The Deny log on locally user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on through Remote Desktop Services user right on member servers must be configured to prevent access from highly privileged domain accounts and all local accounts on domain systems, and from unauthenticated access on all systems.

Unauthorized accounts must not have the Enable computer and user accounts to be trusted for delegation user right on member servers.

The Force shutdown from a remote system user right must only be assigned to the Administrators group.

The Generate security audits user right must only be assigned to Local Service and Network Service.

The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.

The Increase scheduling priority user right must only be assigned to the Administrators group.

	 1  0
 The Load and unload device drivers user right must only be assigned to the Administrators group.	
	 1  0
 The Lock pages in memory user right must not be assigned to any groups or accounts.	
	 1  0
 The Manage auditing and security log user right must only be assigned to the Administrators group.	
	 1  0
 The Modify firmware environment values user right must only be assigned to the Administrators group.	
	 1  0
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 1  0
 The Profile single process user right must only be assigned to the Administrators group.	
	 1  0
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 1  0
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.

The Deny access to this computer from the network user right on member servers must be configured to prevent access from highly privileged domain accounts and local accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on as a batch job user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

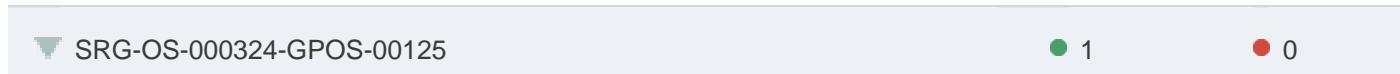

The Deny log on as a service user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems. No other groups or accounts must be assigned this right.

The Deny log on locally user right on member servers must be configured to prevent access from highly privileged domain accounts on domain systems, and from unauthenticated access on all systems.

The Deny log on through Remote Desktop Services user right on member servers must be configured to prevent access from highly privileged domain accounts and all local accounts on domain systems, and from unauthenticated access on all systems.

Unauthorized accounts must not have the Enable computer and user accounts to be trusted for delegation user right on member servers.

The Force shutdown from a remote system user right must only be assigned to the Administrators group.

The Generate security audits user right must only be assigned to Local Service and Network Service.

The Impersonate a client after authentication user right must only be assigned to Administrators, Service, Local Service, and Network Service.

The Increase scheduling priority user right must only be assigned to the Administrators group.

	 1  0
 The Load and unload device drivers user right must only be assigned to the Administrators group.	
	 1  0
 The Lock pages in memory user right must not be assigned to any groups or accounts.	
	 1  0
 The Manage auditing and security log user right must only be assigned to the Administrators group.	
	 1  0
 The Modify firmware environment values user right must only be assigned to the Administrators group.	
	 1  0
 The Perform volume maintenance tasks user right must only be assigned to the Administrators group.	
	 1  0
 The Profile single process user right must only be assigned to the Administrators group.	
	 1  0
 The Restore files and directories user right must only be assigned to the Administrators group.	
	 1  0
 The Take ownership of files or other objects user right must only be assigned to the Administrators group.
